BRINGING AFFORDABLE LPG TO COMMUNITIES

GASBANQ

LPG Satellite Filling Station

BENEFITS

END-USER FOCUSED LPG INFRASTRUCTURE

- 🔌 Clients can partially fill cylinders with LPG starting at R50 or 1 kg.
- 🔌 Offers customers LPG at lower prices, while not having to sacrifice on profit margin for the Gas Banq owner/operator
- 🔌 Option of including an embedded LPG generator to power surrounding facilities during load shedding, creating a local hub around the unit
- 🔌 Can be operated by distributors, wholesalers, or independent local entities, thereby creating jobs, and stimulating local economies
- 🔌 LPG is cleaner and safer than diesel or paraffin and there are environmental benefits to displacing fuels such as coal, charcoal, and hardwood
- 🔌 Streamlined design, manufacturing, and assembly procedures mean Gas Banqs can be implemented within 4 months from order placement
- 🔌 Gas Banqs are easily expandable if the market grows and can be lifted and relocated to different sites
- 🔌 Allows for point-to-point delivery of LPG from an import terminal to the Gas Banq distribution centre

PROFITABLE

POINT-TO-POINT

CREATE AND EXPAND LPG MARKETS

GASBANQ

Well suited to CSI and alternative energy initiatives.

Can fill all sizes of cylinders from 5 kg to 48 kg.

Easily deployable at existing fuel forecourts and depots
